

# TRES

## MAINS WATER AND PURIFIED WATER IN THE SAME TAP

The filter uses 100% of the mains water.

It removes the need for bottled water, thereby reducing your impact on the environment.

It eliminates impurities while respecting the mineral properties of the water.

Purified water at home for less.

# HEALTHY WATER FOR RESPONSIBLE CONSUMPTION

Various studies show that osmosis systems tend to waste up to 9 litres for every 1 litre of water filtered, or up to 40 times more if the pressure is incorrect; and the best of them still waste at least 1 litre of water for every 1 litre filtered.

**The Tres purifier filters water instantly, without wasting litres and litres to do it.**

Other systems, such as inverse osmosis, treat drinking water by eliminating all the minerals that are essential to our health. The minerals in water are invisible but also essential.

**The Tres filter eliminates any unpleasant taste and impurities while respecting the mineral properties of mains tap water.**

Using plastic leads to significant recycling costs or its accumulation in landfill dumps. <sup>1</sup> Furthermore, contaminants from the bottle can potentially affect the water.

**It removes the need for bottled water, thereby reducing your impact on the environment.**

The average price of mains tap water is € 0.0015/litre, while a litre of bottled water can cost € 0.21. Bottled water is 140 times more expensive than tap water. <sup>2</sup>

**Mains water and filtered water straight from the same kitchen tap.**

<sup>1</sup> According to AEOPAS (Spanish Association of Utility Operators), 300 times more energy is needed to produce one litre of bottled water than one litre of tap water.

<sup>2</sup> According to figures from the Spanish Ministry of Health, tap water costs € 1.57 per 1,000 litres.

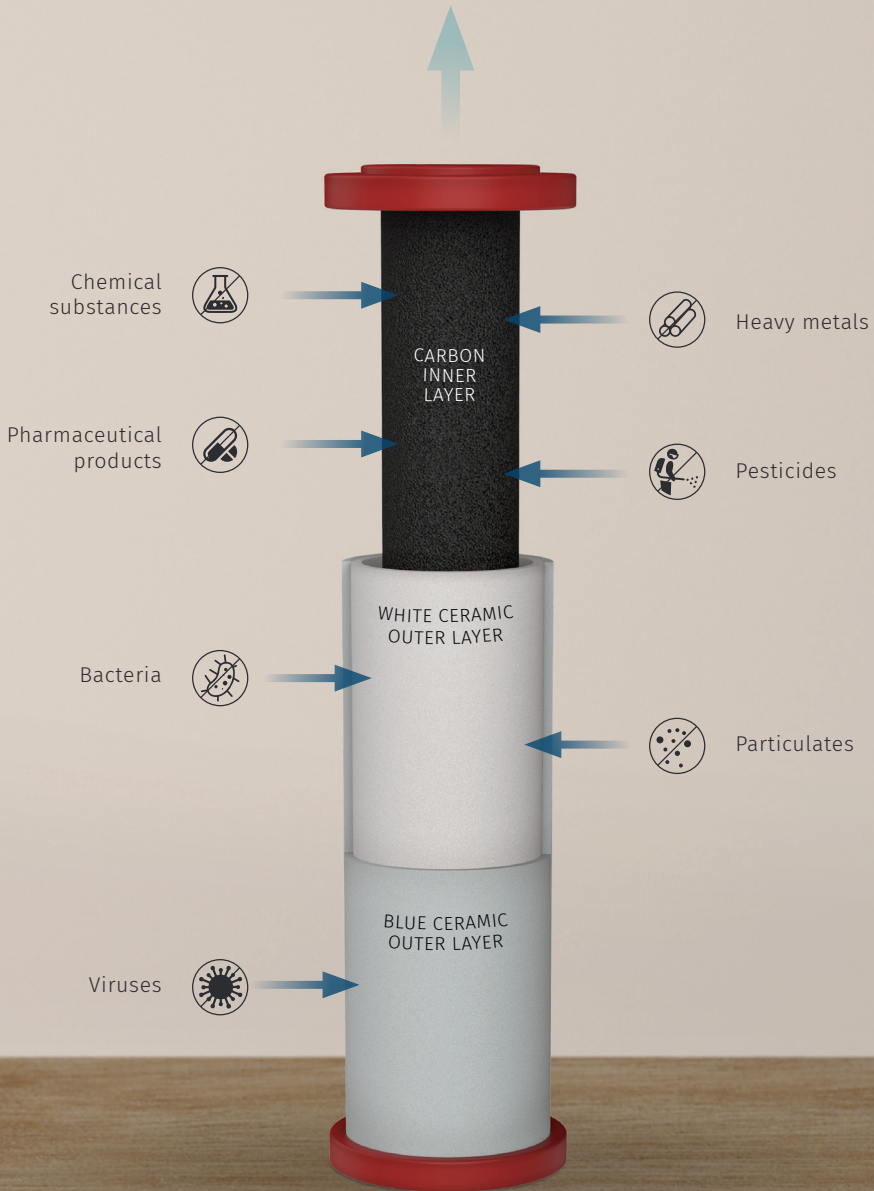

**Freshly filtered  
water straight from  
your kitchen tap**

- Minimal installation work in almost no space at all.
- The filter can be replaced easily.
- Effective for six months under standard usage conditions.
