

Dornbracht Kitchen – New Brushed Stainless Steel Sinks

Available from January 2025

Our new brushed stainless steel sinks offer premium design combined with a unique drain system.

Innovative Drain System

Our new stainless steel sinks come with an innovative drain system. The covered drain basket dives into the kitchen sink and forms one entity with the sink, both when open or closed. It will only come up for cleaning purposes. It can either be operated with our pull button or our electronic drain.

Design

The sinks have an attractive design with 15mm edge and bottom radii and a soft brushing structure created by a brushing with natural sisal fibers.

Product Types

Installation Mode

Under-mounted sink

Top-mounted sink

Operating Mode

Electronic drain system

Product Details

15mm radii in the edges and on the bottom

Easy cleaning due to the radii

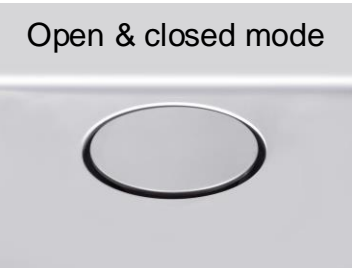

Soft brushing structure for ideal drainage

Covered overflow

1mm thickness of the steel
