TECEloop flush plates

**NEW LOOK
NEW FEEL**

TECE 

A FRESH LOOK

FOR THE ORIGINAL

Two round buttons, harmonious, functional and beautiful. We couldn't improve the shape. But we've given the surface a makeover.

MIX & MATCH

TECEloop is still a classic among designer flush plates – and to this day remains unique with its modular system. Now we're presenting new covers.

The TECEloop modular system: an individual flush plate is made up of a cover and buttons. A wide range of materials and colours ensures the right cover to cater for every taste and every interior.

TECEloop

CONCRETE

05

Concrete used to be what lay behind the plaster. Today we use it deliberately: from the wall to the vase, we proudly display it in all its diversity. Now also as a toilet flush plate.

Raw and cool are yesterday. In combination with warm woods, fluffy textiles and harmonious lighting, concrete becomes an exciting environment for a new level of comfort.

TECEloop

WOOD OAK

08

No other material gives us the feeling of nature indoors as directly as real wood. Do you also feel like you can smell the forest?

NOTHING LIKE THE REAL THING

Nature cannot be improved on. That's why we prefer to work directly with the original.

Not just labels: every cover from the TECEloop modular system is made from what it says. We don't use imitations in production; we use real oak, real concrete, real marble and real slate.

TECEloop

MARBLE

The material of the rich and beautiful has long since lost its elitist conceit. Innovative processing methods have led to a renaissance of this special natural material in interior design, where it now takes into account our yearning for nature and authenticity.

Solid yet delicate, marble touches our senses in a unique way. Perhaps one reason why it is particularly able to express our appreciation for objects and spaces.

TECEloop

SLATE

Greetings from the kitchen, served on a slate plate. The rugged elegance of this dark stone fascinates us in numerous environments. Even in the bathroom.

Delicate tones contrast with rugged structures: where slate and soft colours meet, eyes and hands experience a sensual interplay of the elements.

TECEloop

GLASS

Probably the most classic material that is used in our covers. However, new fresh colours let the most traditional of all TECEloop plates shine in a completely new light.

TECEloop evening blue

A deep, dark shining blue that awakens a longing for the sea, lemons and the scent of the Amalfi Coast. For sensual, elegant accents.

TECEloop titanium

Titanium is used in applications ranging from aircraft to accessories. Its warm grey makes it an all-rounder for us as a colour that fits perfectly into any environment.

TECEloop light beige

Instead of being clinically cool, this plate appears comfortably soft in its tone of fluffy flannel. For bright bathrooms to feel good in!

Delicate but never fragile

TECEloop covers made of glass appear almost weightless thanks to their particularly transparent surface and flat wall structure. For everyday life, their extremely hard and scratch-resistant surface makes them extremely easy to clean.

Portrait: Martin Jepp

“ Behind every colour, every sound, smell, taste or tactile sensation, there is an infinite number of connections in the universal spectrum of human perception. ”

Prof Axel Venn

The colour researcher, designer, author and colour artist devotes a large part of his work to strategic trend scouting and the effects of colours on society, the economy, design and marketing. He is professor emeritus for colour design at the University of Applied Science and Art, Hildesheim, and advises companies worldwide on questions of product design, colour marketing and an authentic colour policy. With his many years of experience, Professor Venn supported TECE in developing new surfaces and colours for TECEloop.

INTERPLAY OF LIGHT AND COLOURS

The best way to experience how diverse glass can be is to visit the glassblower island of Murano in the Venice lagoon. Admittedly, we don't have quite so much freedom in terms of design. And yet TECEloop develops its very own character from colour to colour.

TECEloop MODULAR SYSTEM

Because it is often the detail that count, the TECEloop modular system combines the cover and buttons individually.

can be optionally ordered separately.

TECE!

Perfectly integrated

It's worth taking a closer look here: for an even more harmonious look, all TECEloop flush plates can optionally also be installed flush.

Special installation frames for both toilet and urinal flush plates are available for flush mounting.

COMPATIBLE ALL-ROUND

TECEloop

TECESquare

TECEvelvet

TECESolid

TECEnow

No limits

All TECE flush plates are compatible with the universal cistern from TECE. For renovations and modernisations, they can be interchanged regardless of series and year. Even after decades. Planning and design in a modular system. Made by TECE.

GET TO KNOW US BETTER

TECE supports builders, planners and architects in implementing their construction projects. Visit www.tece.com, where you can find detailed information about the company, products and services.

Design Catalogue

From shower channels and room thermostats to toilet terminals: the design catalogue introduces the world of attractive TECE products in front of the wall.

Design & Creation

Freedom of design. Issues of space and architecture, individuality and design and function and technology are aimed primarily at architects and bathroom designers.

Project & Planning

Reliability in terms of time, legal aspects and economic efficiency. This brochure is intended for planners, architects and investors.
